

DYER & BUTLER

Case study

A33 Ringway Interchange

THE SUCCESS OF THE PROJECT WAS FOUNDED ON MAINTAINING CONSTANT HEAVY TRAFFIC FLOW AT ALL TIMES.

Client: Hampshire County Council

Duration: October 2006 - May 2007

Location: Basingstoke, Hampshire

Form of Contract: ICE 7th

Value: £1.8 Million

Civil Engineering and Building

CASE STUDY

A33 RINGWAY INTERRCHANGE

Works are currently 18 weeks into a 30 week programme for a Hampshire County Council scheme which involves the installation of traffic signals at both the A33 Interchange and Popley Way junctions, as well as a right turn facility into Popley Way.

The A33 Interchange (Section A) works are nearing completion with the Popley Way, Section B works commencing after Easter.

Works undertaken on Section A to date, include carriageway widening, earthworks, laying of service ducting, construction of shared cycleway/footpaths, drainage, safety fencing, replacement parapets and various aspects of road construction and surfacing.

Challenges of the contract included working around the heavy traffic flows and the restrictions that were in place that meant no lane closures were allowed during peak hours.

Only one road closure was allowed at any one time and works were required to be completed prior to the commencement of further closures. Extensive traffic management planning and installation ensured that the road works operations ran smoothly and within the tight timescales requested by the Client.
